Data Converter™

The EA Data Converter™ is the PC based desktop application that acts as an extension of your Voter Registration System, using export files to create the Election Assistant™ Palm® application. Deploy countywide voter registration and polling place locator data to every polling place using the EA Data Converter™, the Election Assistant™, and inexpensive Palm® hardware.

The EA Data Converter™:

- Convert your voter registration export files for use with the Election Assistant™ instantly "in-house"
- Update the Election Assistant™ database anytime for Election Day administration, voter outreach campaigns, and canvassing
- Cost-effective solution for large county or statewide implementation
- Compatible with any Election Management System or Statewide Voter Registration System
- EA Data Converter™ includes Election Assistant™ user licensing for every precinct, product version updates, and telephone support
