

Better Elections Every Day

STATE Profile

CENTRAL VOTER REGISTRATION DATABASE MANAGEMENT SYSTEM

StateProfile® is a powerful and flexible database management application that enables election officials to securely maintain, track, and exchange voter registrant information with various State and Local agencies.

Because StateProfile efficiently provides consistent State-wide voter data to the entities that need it, the quality of government is enhanced and operating expenses reduced.

Features and Benefits

StateProfile delivers the following key features and benefits:

- ◆ Efficiently provides more data consistency, integrity, and availability to those State offices and agencies that need it
- ◆ Maintains a comprehensive database that includes the registrant records and voting histories of all active and inactive registered voters in the State
- ◆ Notifies Local election authorities regarding potential changes in registrant information or status generated by a variety of State agencies
- ◆ Alerts local election authorities of the potential existence of duplicate registrant records between or within localities
- ◆ Enables the State to maintain and report statistics, including the collection and reporting of NVRA statistics
- ◆ Standardization of data results in improved subsets of information at all State levels
- ◆ Electronic election night reporting may be incorporated
